

Australia's Food &
Beverage Industry
Specialists

Capability Statement

About Us

Our Background & Our Culture

The food, beverage and pharmaceutical manufacturing sector is our field of expertise. We understand the requirements, the standards, and the unspoken expectations. Our experience in this industry has shaped our offering, our culture and is now shaping our future.

Our Background

Our vision began with Laurie Gillies, our founder, Michael's grandfather. A qualified food chemist, Laurie instilled a love of chemistry into his son Graham, who pursued an industrial line of chemistry. As the Chief Industrial Chemist for Balm (now Dulux), Graham formulated coating systems for various industrial applications, including the development of polyurethanes in Australia.

With this strong history of chemical innovations behind us, we launched our offering of hygienic flooring solutions into the Food & Beverage industry.

Since earning our reputation in the industry, and off the back of many complex projects involving more than the floor, we decided to expand our service offering to the industry.

*"There's a better way to do everything,
it's your job to find it."*

- Graham Gillies

Our Culture

"If it's worth doing, it's worth doing well" - a statement that captures the essence of our culture. We believe in doing things right the first time - we don't take shortcuts. Every person on our team - from our consultants through to our installers has the best in mind for the customer.

To maximise quality assurance on every project, we have implemented many procedures and quality systems to follow. We have an excellent reputation for successful projects, and work with many well known companies to solve their challenges.

Our Values

- **Passionate Ambassador**
Enthusiastic | Energetic | Hungry
- **Committed**
Disciplined & Reliable | Tenacious | Hard-working
- **Proactive**
Professional Problem Solver | Think Ahead For the Team & Client
- **Positive**
Positive Influence | Encouraging
- **Fair Dinkum**
Transparent | Accountable | Honest & Trustworthy

Why Partner With Us

Our Experience & Our Expertise

While our expertise is continually evolving, our core focus has always stayed the same. We focus specifically on three core industries with exceptionally high hygiene standards - Food and Beverage Manufacturing, Pet Food Manufacturing, and Pharmaceuticals. Working exclusively in this industry has shaped our knowledge, and given us the opportunity to learn from each organisation we work with, in turn enabling us to provide expert advice to other organisations.

Our Experience

Working in the Food, Beverage and Pharmaceutical Industry for over a decade, we have gained a high reputation for providing solutions that are durable, safe, compliant to food safe standards, and delivered as fast as possible. We have worked with many well-known companies that depend on us as a long-term partner.

Our Expertise

With a strong technical and chemical background, we started out as a flooring company in 2012. After several years of steady growth, we began taking on larger flooring projects exceeding \$500,000.

This led us into taking on projects that involved not only the flooring, but a range of other related services, such as plumbing and drainage, surveys and 3D drawings, cleanroom fitout, wall protection, barriers, and many other related services.

Our offering today is still evolving. But our focus on providing the best solutions for the food, beverage and pharmaceutical industry will never change.

Our Capabilities

- **Construction projects**

With a particular focus on internal construction, with the capability to take on works including deconstruction and termination of services

- **Fitout projects**

Extensive experience in areas such as changerooms, cleanrooms and washrooms. From the boot racks to knee-operated sinks, we have experience in it all.

- **Repurposing projects**

Every year, new contracts are signed, and the demands of a factory change. As a result, coolrooms are turned into production areas, or warehouses into coolrooms to accommodate the needs. Our experience in this area is second to none.

Who We Work With.

From top 100 companies, to start up food manufacturers, we've worked with them all.

“

I highly recommend Allied Finishes. They offer **excellent customer service**, and the quality of their work is first class.

- Michael Slater, Casella Family Brands

“

The team at Allied just finished our large factory in Pen-rith. **Great job!** Troy and his team worked day and night for almost 4 weeks to get it done. **The finished job looks fantastic.** Highly recommended.

- Paul Meyer, Paringa Pet Foods

“

Allied always delivers with everyone from management to the operations team being **focused on delivering the right outcome for us.** Consummate professionals at what they do!

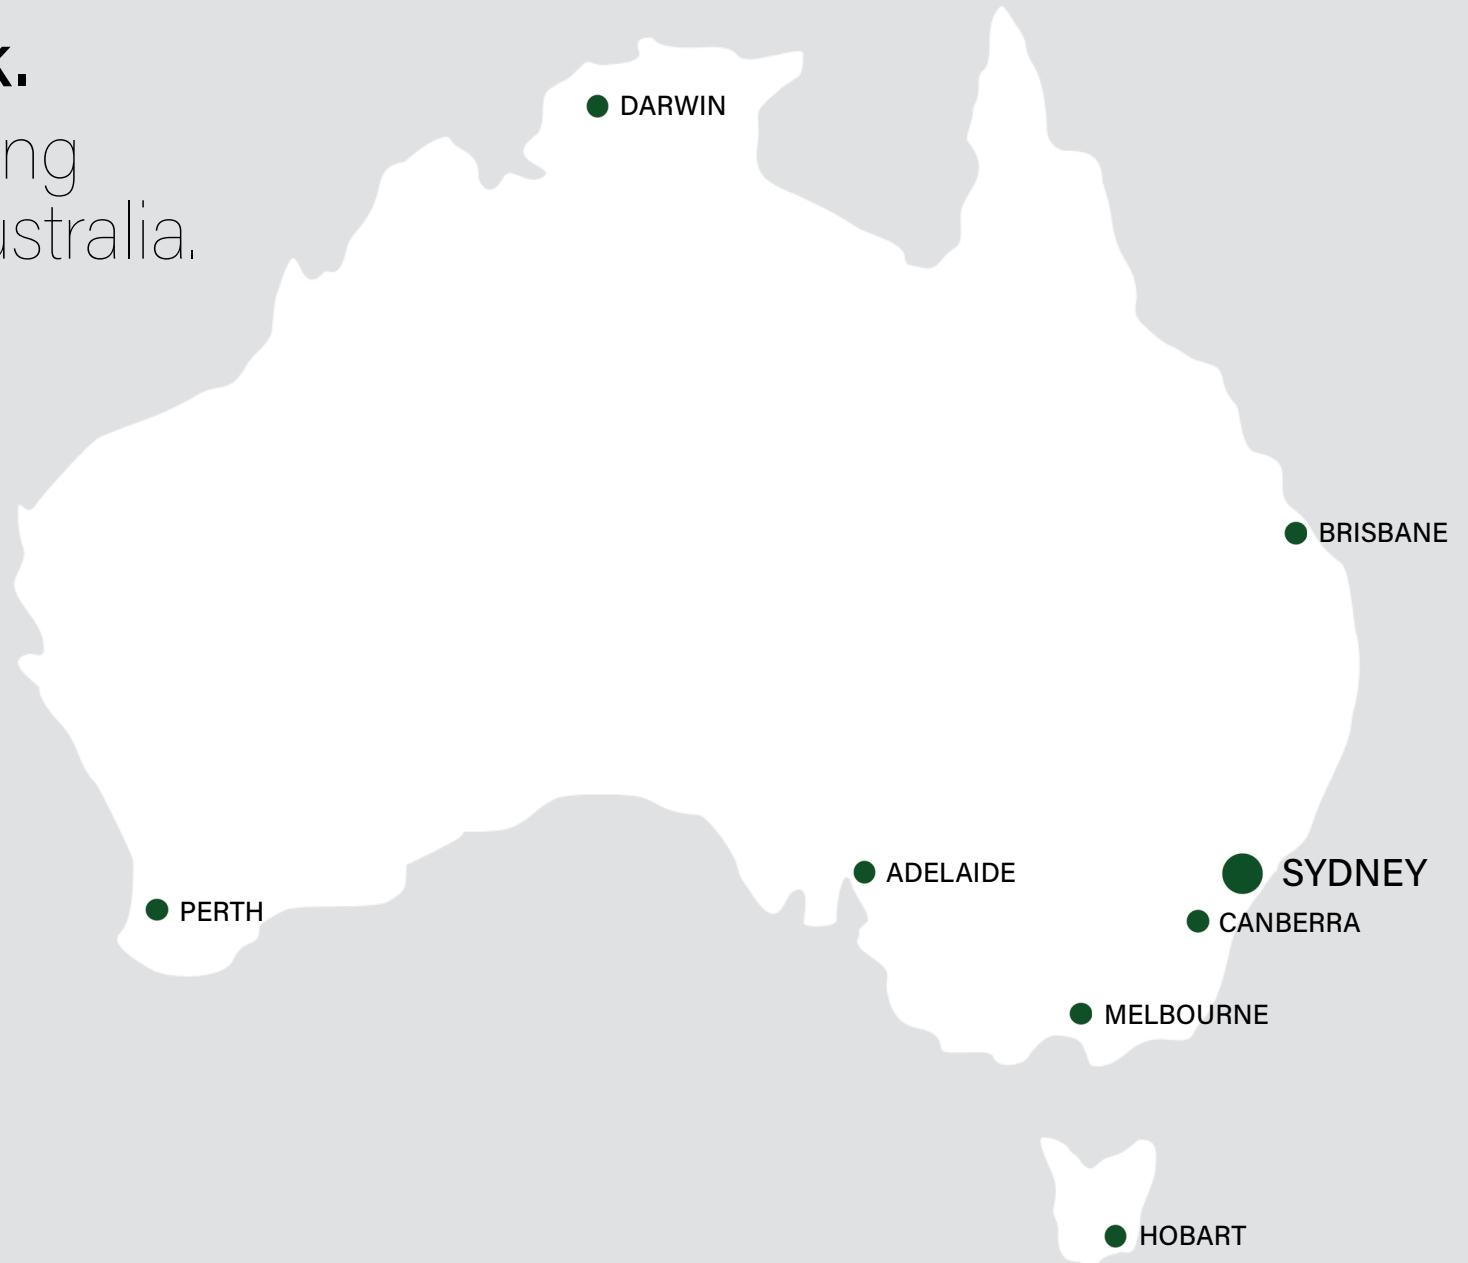

- Tobias Dunn, My Muscle Chef

Where we work.

Australians serving
