PRODUCT	STERIFLOOR STÄRKE	
AREA	1150M2	- FLOORING
	980M2	- FALLS TO DRAINS
	112M2	- CONCRETE HOBS

Sydney Lambs, established in 2015 by Robert Nguyen, is a privately owned lamb processing facility known for its efficiency and quality standards. Robert's passion, strong work ethic, and commitment to excellence has ensured continued strong growth supplying Sydney's top butchers and restaurants.

Sydney Lambs recently expanded its operations by acquiring a factory in Homebush, which has been extensively renovated and upgraded to now present as a world class meat processing facility. This strategic move reflects Sydney Lambs' dedication to providing premium products while retaining a competitive edge in the food industry landscape.

Allied Finishes was engaged to provide professional advice on the flooring and drainage of the upgraded facility, drawing on our sector specific experience and expertise.

Our team designed, engineered, and installed falls to drains, followed by flooring in the SteriFloor Stärke system, complete with hobs and coving. SteriFloor Stärke antimicrobial flooring solution is a fast-curing, food-grade premium polyurethane cement, flooring system suitable for high wear heavy traffic environments.

The partnership with Sydney Lambs exemplifies our dedication to delivering exceptional results and contributing to the success of our clients in the food processing industry. Robert deserves the success he's had, and it's been our privilege to partner with him on this cutting edge project.
