INDUSTRY	PHARMACEUTICAL
LOCATION	DANDENONG SOUTH, VIC
PROJECT	FACILITY FITOUT & UPGRADE
PRODUCT	STERIFLOOR BESCHÜTZEN
AREA	860M2 FLOORING

Cosmax NBT Australia Pty Ltd, established in 2017 in Dandenong South, Victoria, is a subsidiary of global leader Cosmax NBT. The company has rapidly established itself as a key player in Australia's nutraceutical manufacturing landscape, specialising in the production of tablets, capsules, powders, liquids, and softgels.

Allied Finishes was engaged to address critical flooring issues at Cosmax NBT's manufacturing facility, where the existing floor and expansion joints were failing. Based on our extensive experience with pharmaceutical manufacturers across Australia and superior technical expertise, Cosmax NBT selected Allied Finishes for this significant upgrade project.

Our team specified and installed the SteriFloor Beschützen system across 860 square metres of manufacturing space. This premium antimicrobial flooring solution offers excellent impact and chemical resistance, perfectly suited for areas with heavy foot traffic and medium forklift activity. The successful completion of this project demonstrates Allied Finishes' commitment to delivering specialised flooring solutions that meet the exacting standards of the pharmaceutical and nutraceutical manufacturing industry.

This partnership with Cosmax NBT Australia exemplifies Allied Finishes' commitment to delivering specialised flooring solutions that support the exacting standards of the pharmaceutical and nutraceutical manufacturing industry. The successful completion of this project has contributed to Cosmax NBT's ability to maintain their position as a leading manufacturer of health functional foods in Australia.
